510(k) Summary

Submitter

Bio-Rad Laboratories 9500 Jeronimo Road Irvine, CA (949)598-1285 Fax (949)598-1555

Contact Person

Elizabeth Platt

Date of Summary Preparation

July 18, 2000

Device (Trade & Common Name)

Lyphochek Fertility Control

Classification Name

Class I, 75JJY

CFR 862.1660: Multi-Analyte Control, All Kinds (Assayed and Unassayed)

Devices to Which Substantial Equivalence is Claimed

Lyphochek Immunoassay Plus Control Bio-Rad Laboratories Irvine, California K981532

Statement of Intended Use

Lyphochek Fertility Control is intended for use as an assayed quality control serum to monitor the precision of laboratory testing procedures for the analytes listed in the package insert.

Bio-Rad Laboratories

Diagnostics Group 9500 Jeronimo Road Irvine, California 92618-2017 Telephone: (949) 598-1200

Description of the Device

Lyphochek Fertility Control is prepared from human serum with added constituents of human origin and pure chemicals. The control is provided in lyophilized form for increased stability.

Statement of How Technological Characteristics Compare to Substantial Equivalence Device

A table is provided below comparing the similarities between the Bio-Rad Lyphochek Fertility Control and the devices to which substantial equivalence is claimed.

	Bio-Rad Lyphochek Fertility Control (New Device)	Bio-Rad Lyphochek Immunoassay Plus Control (Substantially Equivalent Device)
Intended Use	An assayed quality control serum to monitor the precision of laboratory testing procedures for the analytes listed in the package insert.	An assayed quality control serum to monitor the precision of laboratory testing procedures for the analytes listed in the package insert.
Form	Lyophilized	Lyophilized
Matrix	Human serum	Human serum
Storage	2-8°C	2-8°C
Open Vial Claim	 7 days when stored tightly capped at 2-8°C. 30 days after reconstituting and freezing when stored tightly capped at -10°C to -20°C. Once thawed, do not refreeze the control; discard remaining material. 	 7 days when stored tightly capped at 2-8°C, with the following exceptions: (2) C-Peptide, Folate and PSA are stable for 3 days after reconstitution, (2) ACTH, Calcitonin, Gastrin and Free PSA should be assayed immediately after reconstitution. 20 days after reconstituting and freezing when stored tightly capped at -10°C to -20°C with the following exceptions: no frozen stability claim is supplied for ACTH, Aldosterone, Androstenedione, Calcitonin, C-Peptide and SHBG. Once thawed, do not refreeze the control; discard remaining material.

Differences Lyphochek Fertility Control claims for the following analytes: AFP, Digitoxin, Estradiol, Estriol, Ferritin, FSH, HCG, HCG-Beta Subunit, HPL, LH, Progesterone, Testosterone.	Same analytes as the Lyphochek Fertility Control plus an addition of 53 analytes; digitoxin and HPL are not claimed in the Lyphochek Immunoassay Plus Control.

Ms. Elizabeth Platt Regulatory Affairs Supervisor Bio-Rad Laboratories 9500 Jeronimo Road Irvine, California 92618-2017

Re: K002196

Trade Name: Lyphochek Fertility Control

Regulatory Class: I Product Code: JJY Dated: July 18, 2000 Received: July 20, 2000

Dear Ms. Platt:

We have reviewed your Section 510(k) notification of intent to market the device referenced above and we have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (Premarket Approval), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. A substantially equivalent determination assumes compliance with the Current Good Manufacturing Practice requirements, as set forth in the Quality System Regulation (QS) for Medical Devices: General regulation (21 CFR Part 820) and that, through periodic QS inspections, the Food and Drug Administration (FDA) will verify such assumptions. Failure to comply with the GMP regulation may result in regulatory action. In addition, FDA may publish further announcements concerning your device in the Federal Register. Please note: this response to your premarket notification submission does not affect any obligation you might have under sections 531 through 542 of the Act for devices under the Electronic Product Radiation Control provisions, or other Federal laws or regulations.

This letter will allow you to begin marketing your device as described in your 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801 and additionally 809.10 for <u>in vitro</u> diagnostic devices), please contact the Office of Compliance at (301) 594-4588. Additionally, for questions on the promotion and advertising of your device, please contact the Office of Compliance at (301) 594-4639. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21CFR 807.97). Other general information on your responsibilities under the Act may be obtained from the Division of Small Manufacturers Assistance at its toll-free number (800) 638-2041 or (301) 443-6597 or at its internet address "http://www.fda.gov/cdrh/dsma/dsmamain.html".

Sincerely yours,

Steven I. Gutman, M.D., M.B.A.
